

When you don't want to compromise your working safety

If working in applications with H-Class hazardous dust or asbestos, safe dust handling is a key parameter. Our series of certified H-class vacuum cleaners offers a convenient and easy-to-use solution with features which enhance safe working.

Choose from different container sizes and features like safety filter bag system, automatic start/stop for power tools and AntiStatic hose system. The build-in FlowSensor and acoustic warning signal monitors air speed in the suction hose to make sure that it does go below the minimum 20 m/s. A safe and easy-to-use solution for demanding applications.

ATTIX 30 and ATTIX 50 are mid-size safety vacuum cleaners with reliable performance and high mobility. Semi-automatic Push&Cleanfilter system keeps the filter clean to increase efficiency and reduce downtime.

AntiStatic hose system and Automatic Start/Stop is the perfect feature for Tradesmen who work with power tools.

In all models, your operating costs are minimized and user-friendliness reaches an all-time high with the low working sound level which lets you work when others are nearby without disturbing them. All Health & Safety Vacuums fulfill the legal requirements as described in the IEC/EN 60335-2-69 standard.

Picture shown may not represent model quoted

- Approved for work with H-Class hazardous dust and asbestos
- Certified H-Class filter with 99.995 - 99.999% filtration efficiency
- Low working sound level - SilentPower - high performance that is seen, but not heard
- MultiFit accessory system for the ultimate in task flexibility
- Accessory storage and tool deposit
