

## Build to pick-up combustible/flammable dust in ATEX Zone 22

The ATTIX 40 TYPE 22 machine is a powerful vacuum cleaner with stainless steel containers approved to be used for both M-class dust and ATEX Zone 22 environments. The build-in FlowSensor and acoustic warning signal monitors air speed in the suction hose to make sure that it does go below the minimum 20 m/s. The perfect concept for Industrial use where safety is a must.

Legislation (IEC/EN 60335-2-69) has placed some very tight restrictions on handling hazardous dust. The TYPE 22 vacuum cleaners fulfill all demands at the highest level of safety to ensure maximum health protection. The use of EC technology meaning single-phase brushless motor makes the machine applicable in ATEX Zone 22 environments. With the electrically conductive and grounded container inlet in combination with the TYPE 22 accessories the vacuum cleaner allows you to work with a safe and spark free solution.

ATTIX 40-0M TYPE 22 is a mid-size vacuum cleaner featuring Push&Clean filter cleaning system to increase efficiency and reduce downtime.

In all models, your operating costs are minimized with the washable PET fleece filter elements, and user-friendliness reaches an all-time high with the low working sound level, which lets you work when others are nearby without disturbing them.

Picture shown may not represent model quoted

- Approved for cleaning and dust extraction in ATEX Zone 22 environments with explosive dust
- Brushless long life EC motors for ignition source-free performance
- High quality stainless steel container
- Washable PET fleece filter with minimum 99.9% filtration efficiency
- A full range of TYPE 22 accessories is available to tailor your machine to your application
